Graduate Software Tester at Boxfusion working on the Shesha framework. Former accountant with a background in financial reporting and data automation, now focused on software quality and engineering.

EDUCATION

WeThinkCode <i>NQF 6 Occupational Certificate in Software Engineering with Distinction</i>	Sep. 2024 – Dec. 2025 <i>Rosebank, Johannesburg</i>
University of Johannesburg <i>NQF 7 Bachelor of Accounting</i>	Feb. 2016 – Nov. 2019 <i>Auckland Park, Johannesburg</i>

EXPERIENCE

Graduate Software Tester <i>Boxfusion</i>	Apr. 2026 – Present <i>Midrand, Johannesburg (Hybrid)</i>
- Perform quality assurance and testing on the Shesha framework, an open-source low-code platform built on .NET and React. - Write and execute test cases to validate features, identify defects, and ensure software reliability. - Currently upskilling in C# and .NET to transition into a software engineering role.	
Technical Mentor <i>WeThinkCode</i>	Sep. 2025 – Nov. 2025 <i>Rosebank, Johannesburg</i>
- Support onboarding by guiding mentees through environment setup and platform access within the WeThinkCode environment. - Collaborate cross-functionally with the Student Performance team to track student progress, identify blockers, and support skills development initiative.	
Accounting Roles (Intern → Specialist) <i>Epiroc / Business Partners</i>	Aug. 2021 – Sep. 2023 <i>Johannesburg</i>
- Automated financial reconciliation workflows using RPA and Power BI across enterprise accounts in Sub-Saharan Africa. - Managed month-end reporting, bank reconciliations, and master data within ERP systems (SAP BW, BPCS, Infor M3).	

PROJECTS

Mzansi Movie Roulette <i>HTML, CSS, JavaScript, OMDb API, Netlify</i>	Aug. 2025
- Built a Netflix-inspired web application that randomly selects movies using the OMDb API - Focused on clean, responsive UI to improve engagement across devices	
SA Weather Dashboard <i>Python (Flask), Dash, Pandas, Plotly, Render</i>	Sep. 2025
- Developed a data-driven weather dashboard providing interactive charts and insights - Built with Flask and Dash, then deployed a production-ready app to Render	

TECHNICAL SKILLS

Languages: Python, Java, SQL
Currently Learning: C#, .NET
